4 Market Strategy

Why we chose this objective??

Todays world is rather competitive and survival means longevity and consistency .

Stress and improper planning makes this journey chaotic and the player cannot endure this for long because of degrading health and morals.

The curriculum that students get subjected to necessarily do not guide them through a holistic path where they not only give importance to the getting marks also take care of the mental and physical strain they might come under by allocating proper activities as stress busters.

Outlook

Increasing Rate Of Suicides Indicates Youth At Grave Risk Of Losing Mental Equilibrium

Every hour one student commits suicide in India, with about 28 such suicides reported every day.

India's schoolchildren suffer from abnormal BMI, vision, dental issues: report

Business Standard

School children in India lack in physical health and fitness, shows national study

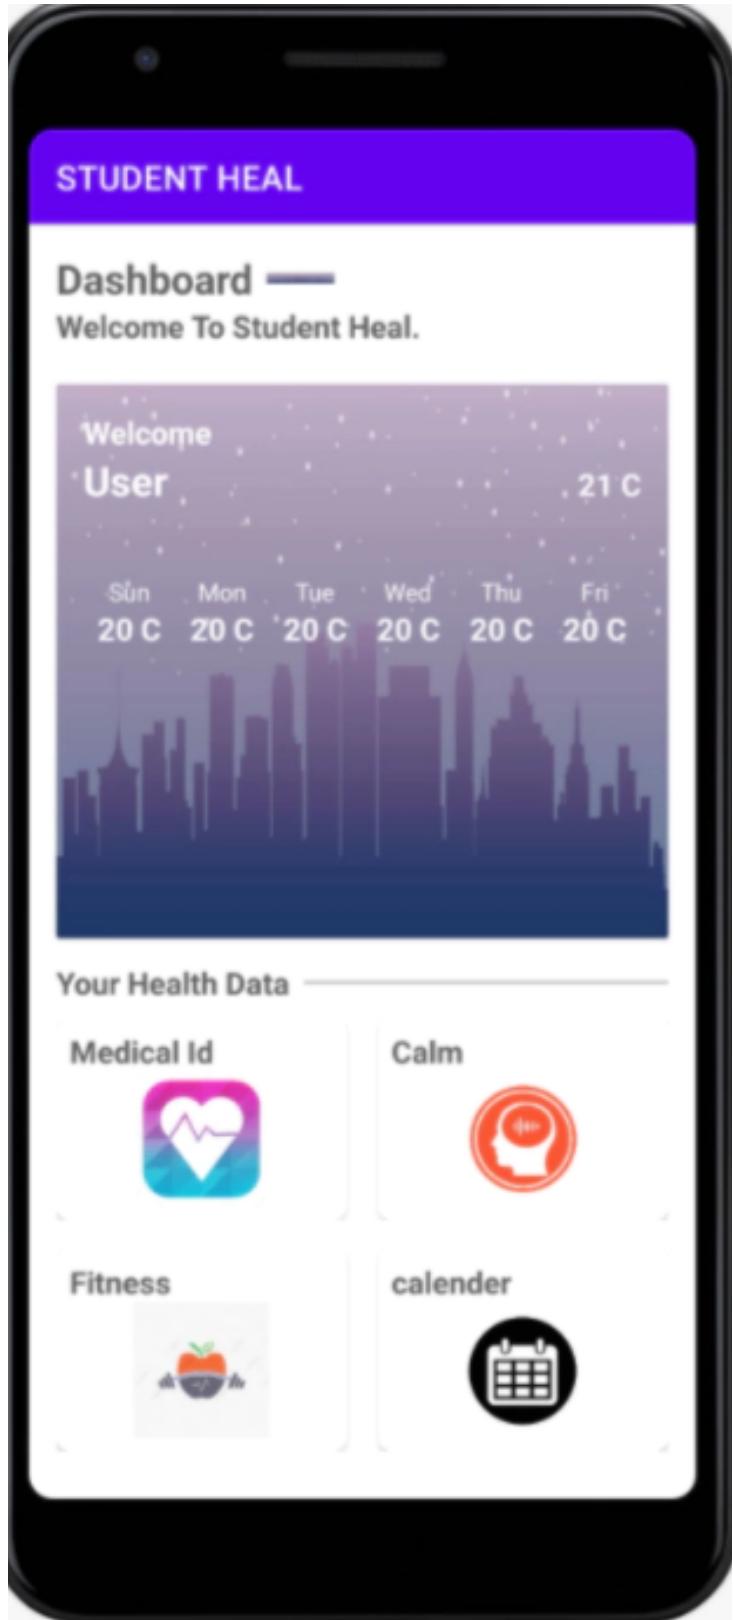

The study conducted by EduSports covered about 100,000 children in the seven to 17 years age group, in 287 schools across 85 cities from 23 states

Our objective is to provide for a platform that integrate all these unaddressed necessities of a modern day student in a single application.

The features we included are explained in the upcoming slides

De-Stressify

MEDICO -

This feature helps in digitising your medical data.

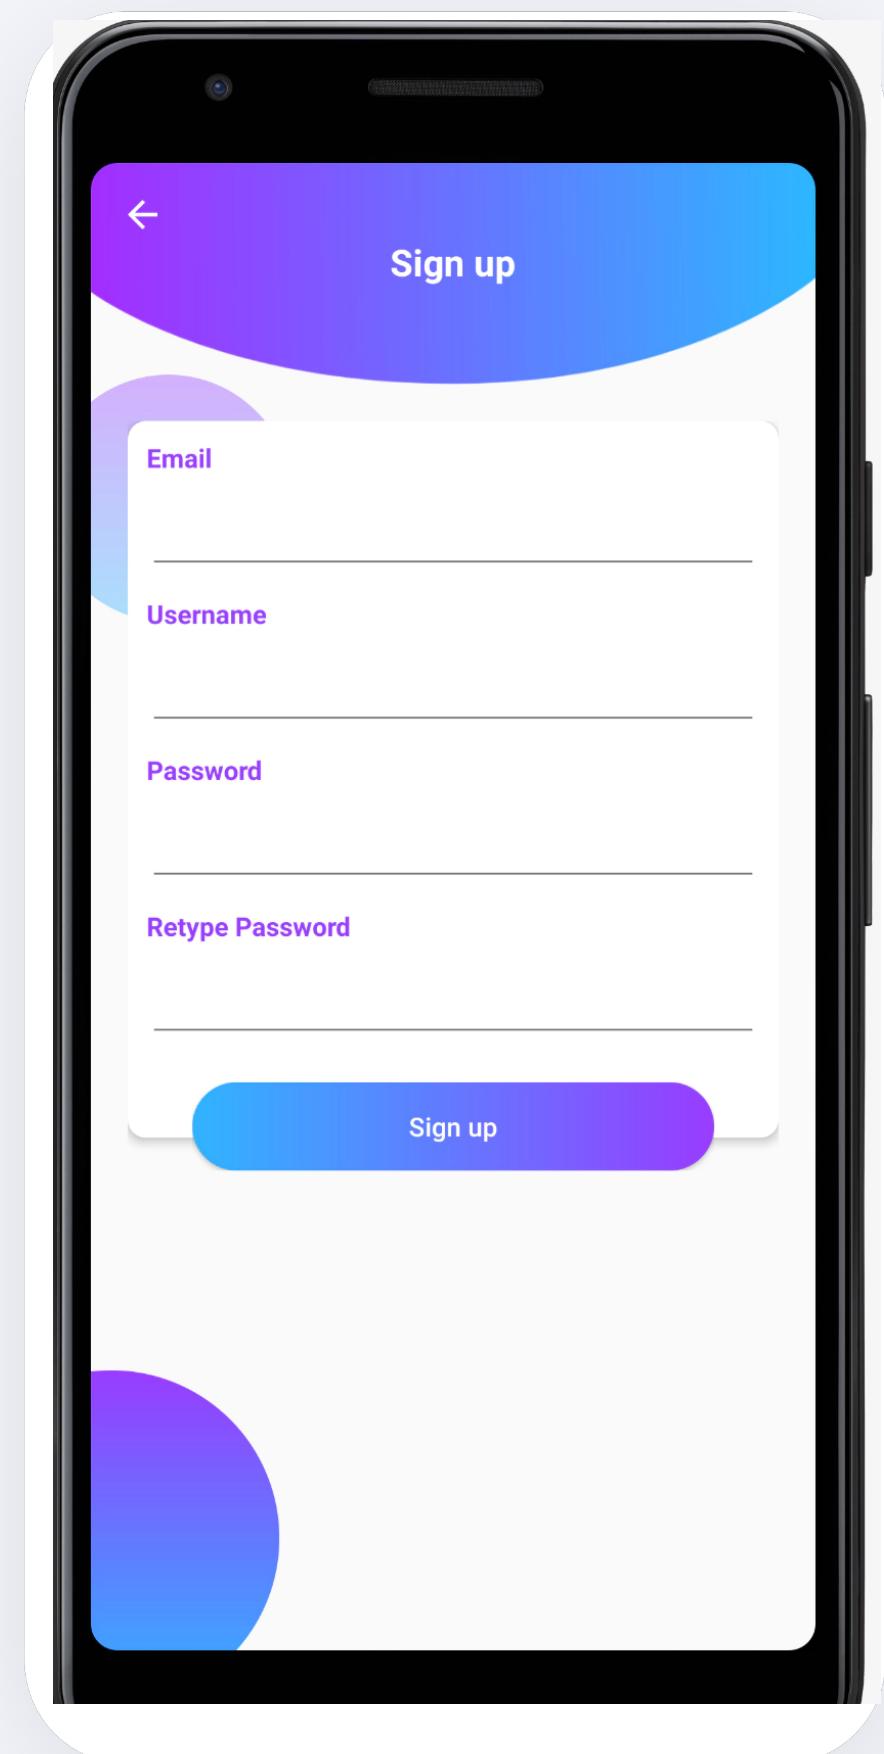

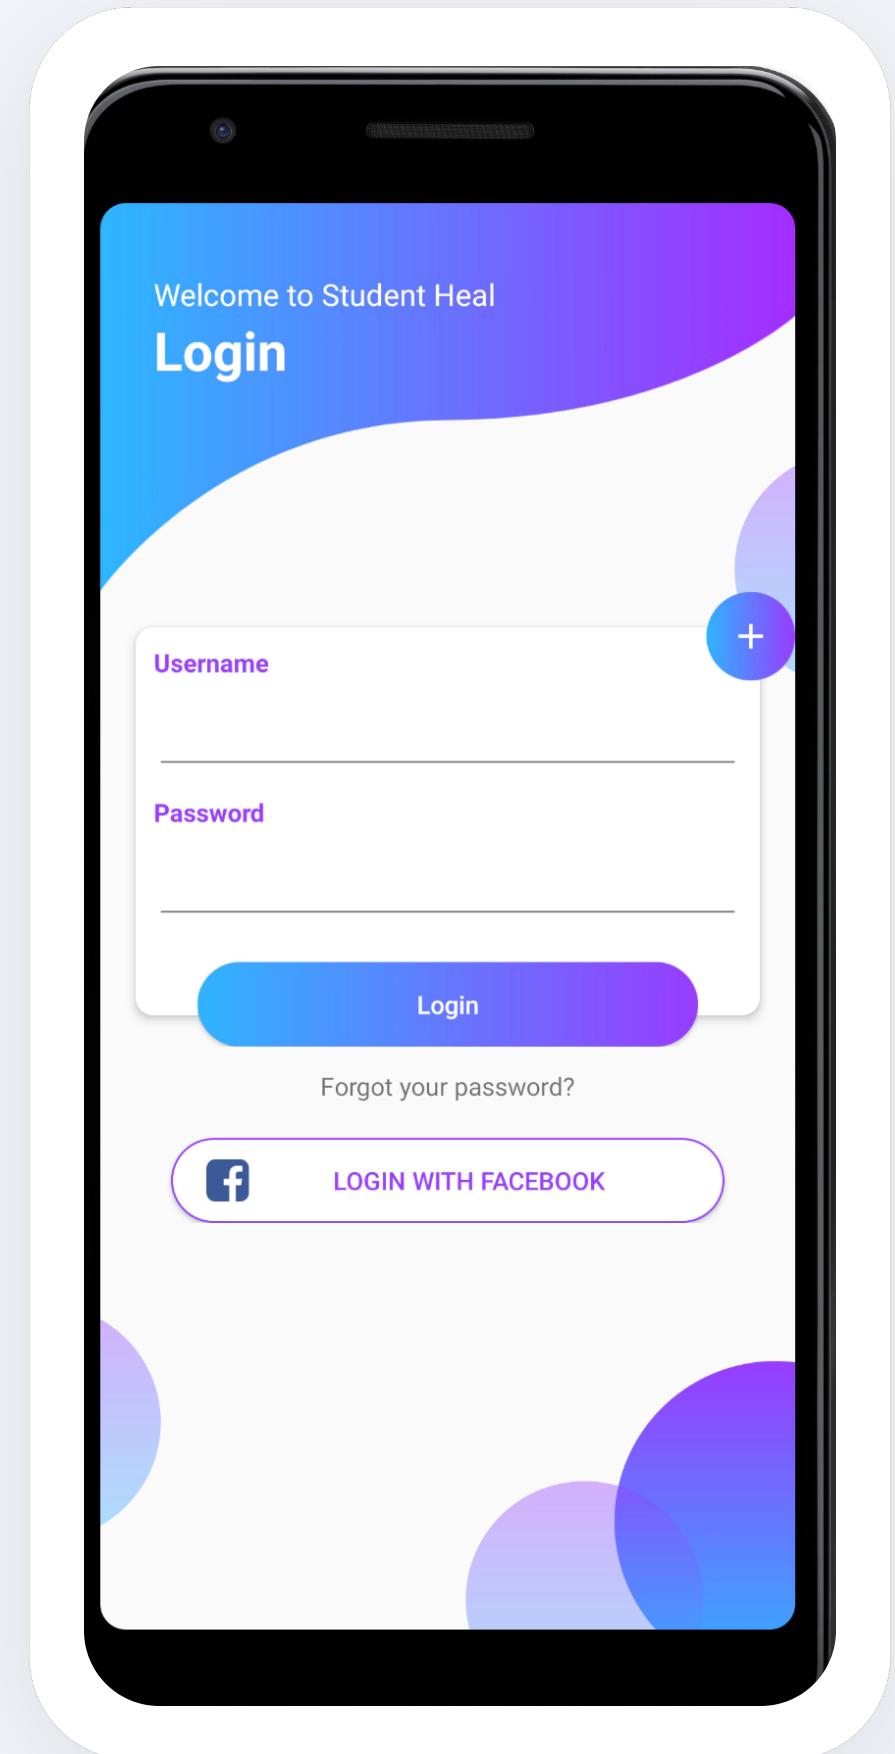

Chances are your phone goes everywhere you go. This feature will help you create a emergency medical id within your phone that allows emergency personnels to access your critical medical information.

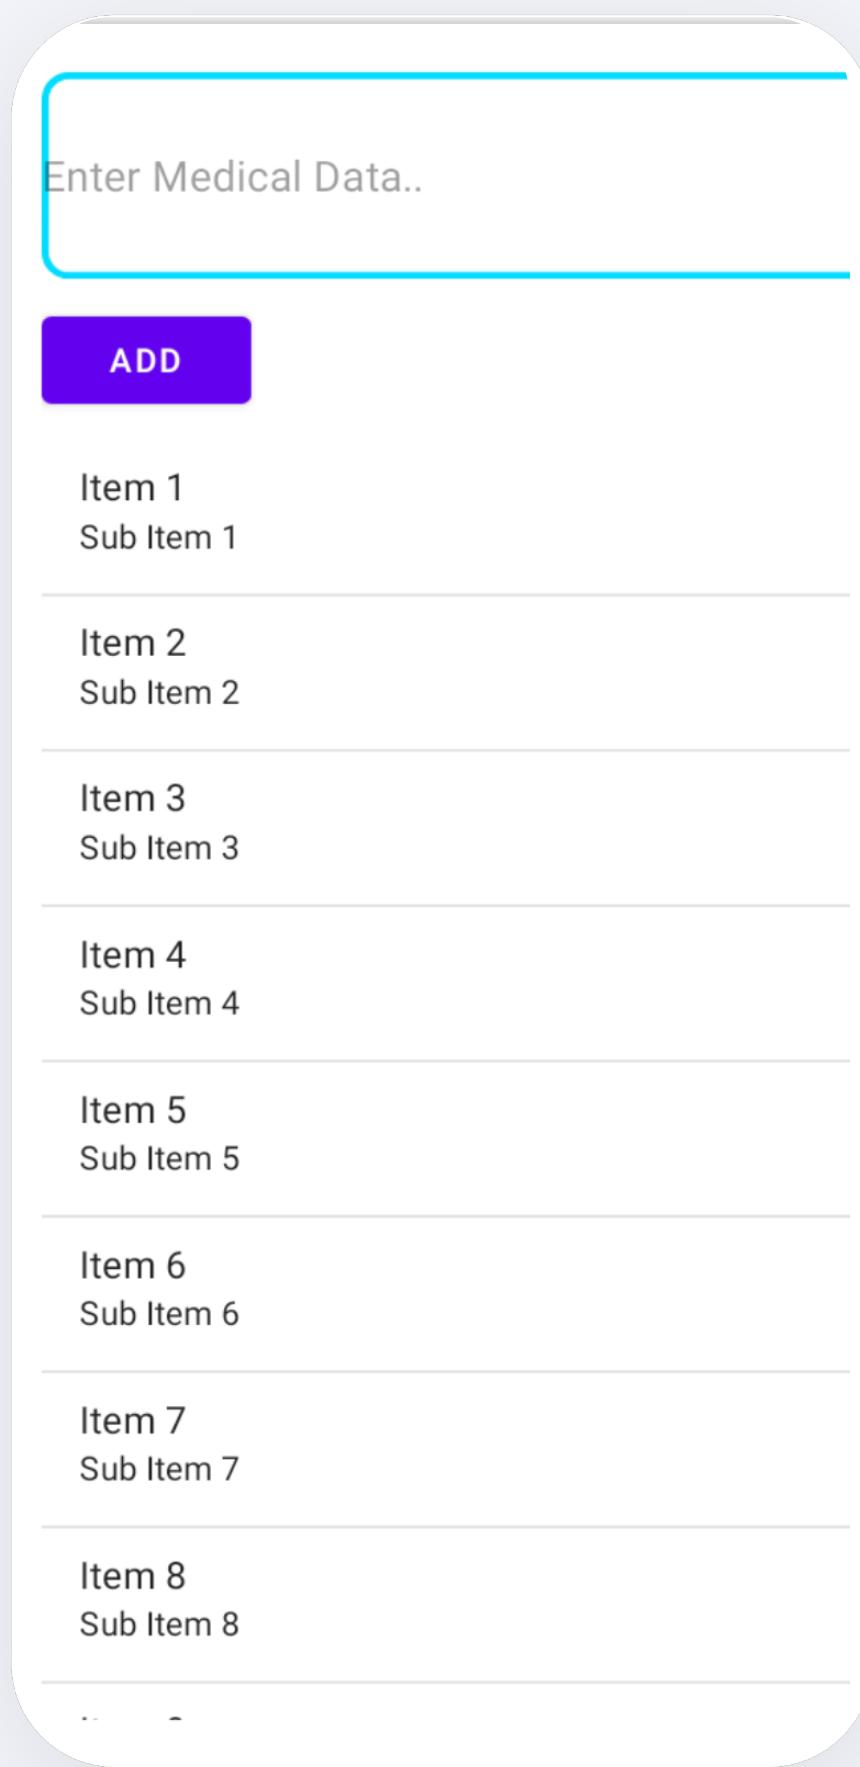

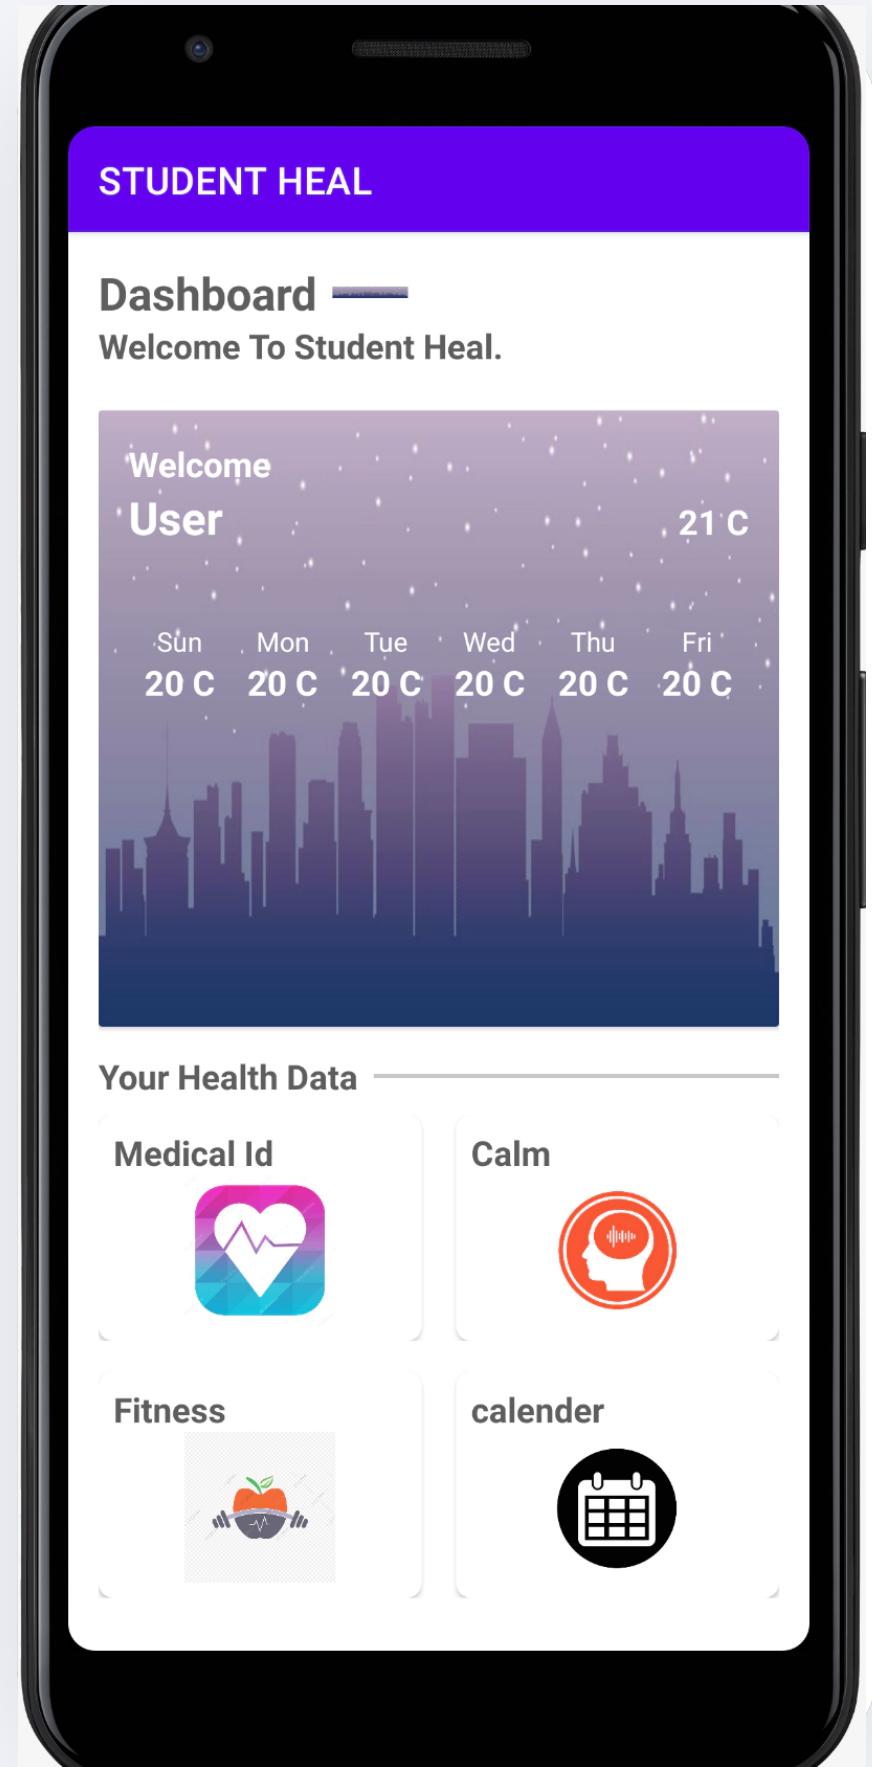

The user can feed vital health data such as medicine prescription, doctor's visit and other medical test results and access to emergency contact.

PLANNER -

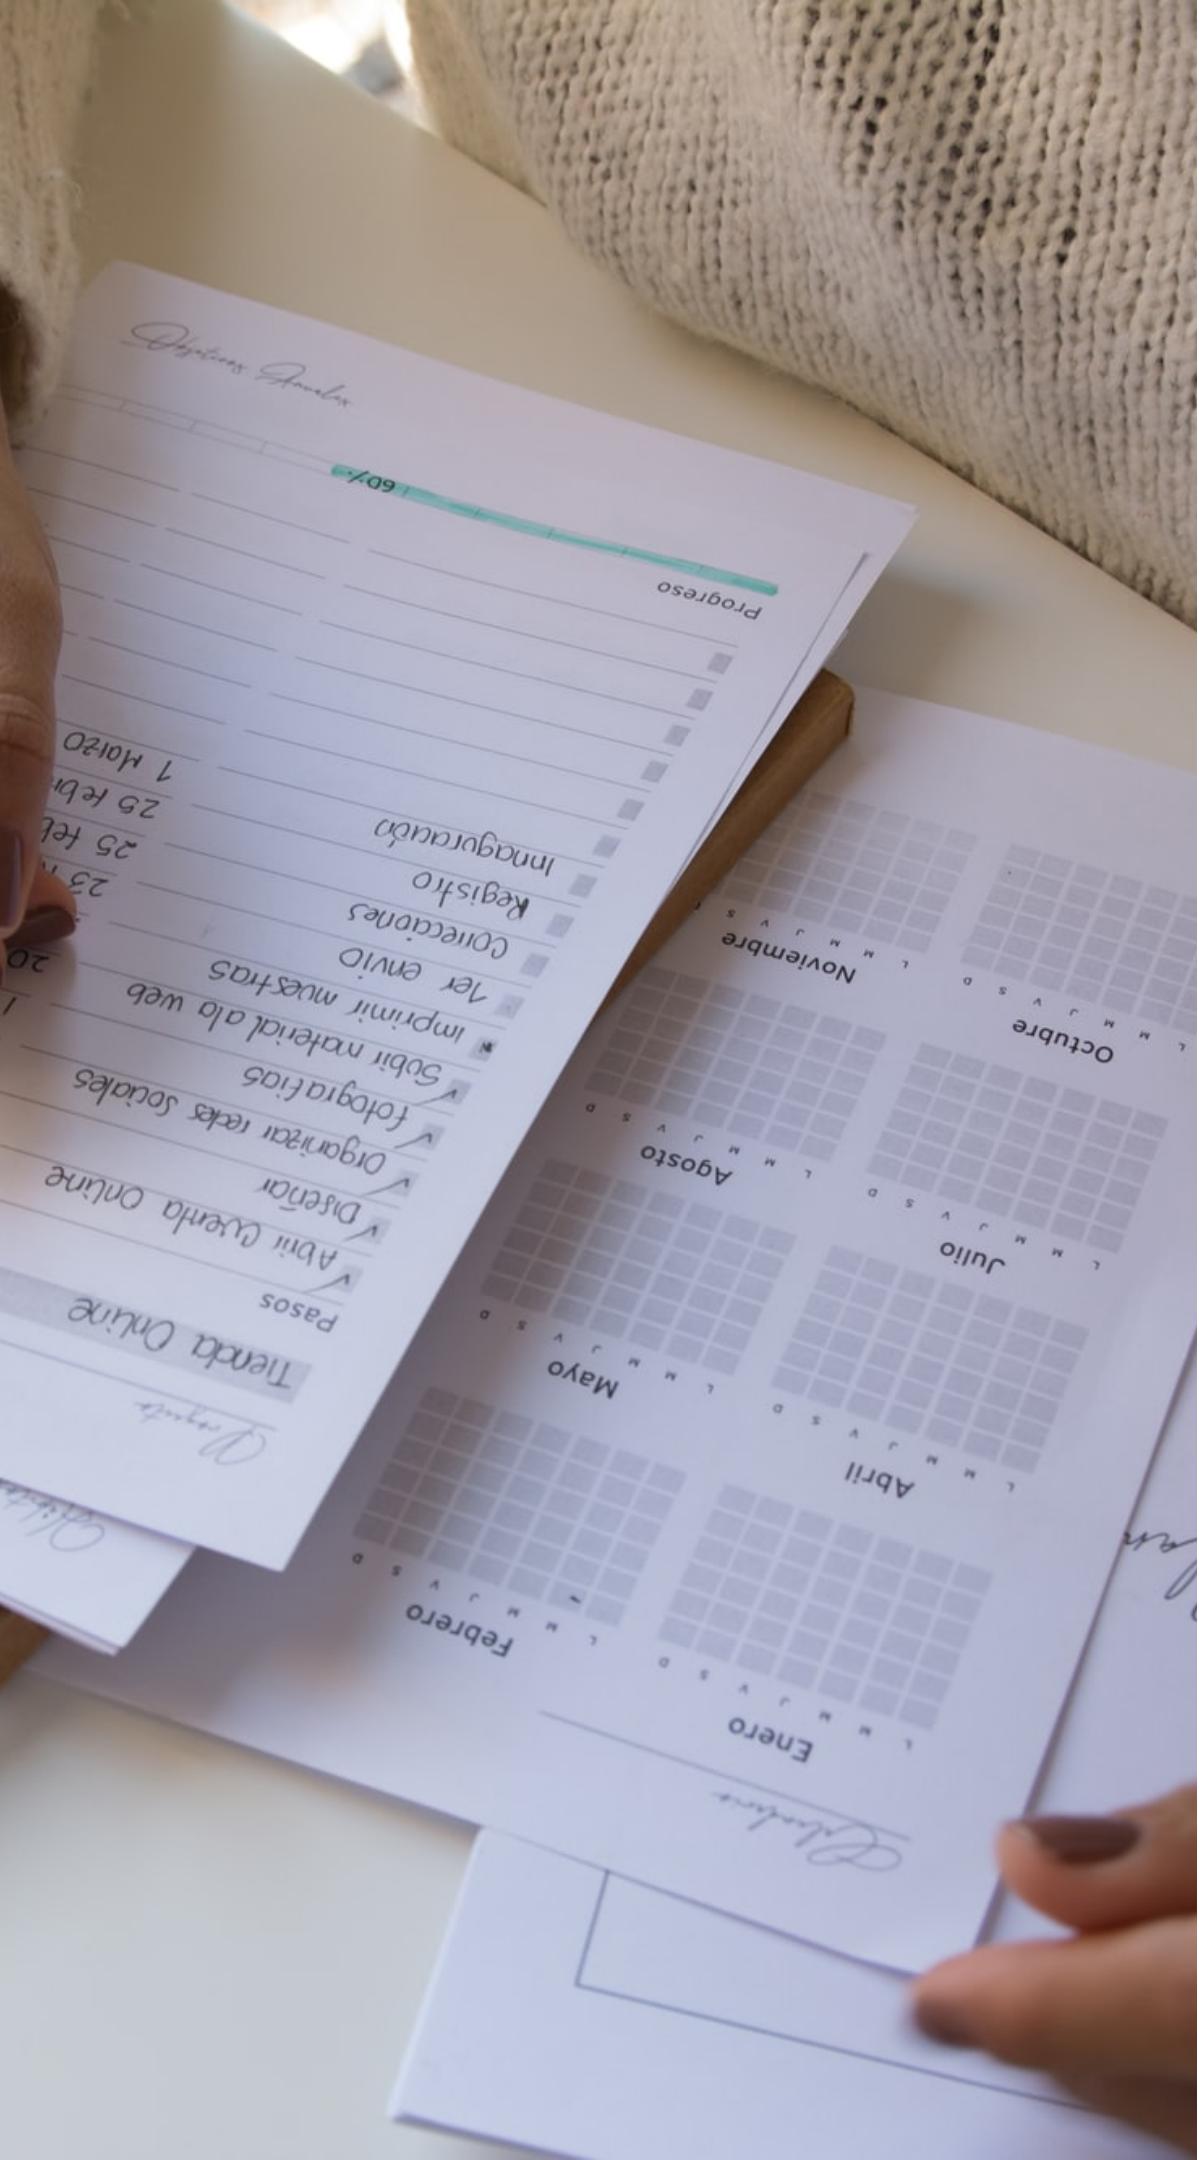

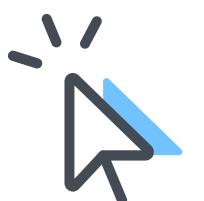

Planner basically consists of Task Manager & Time Table Manager, which allows the users to set their goals & know the progress simultaneously .

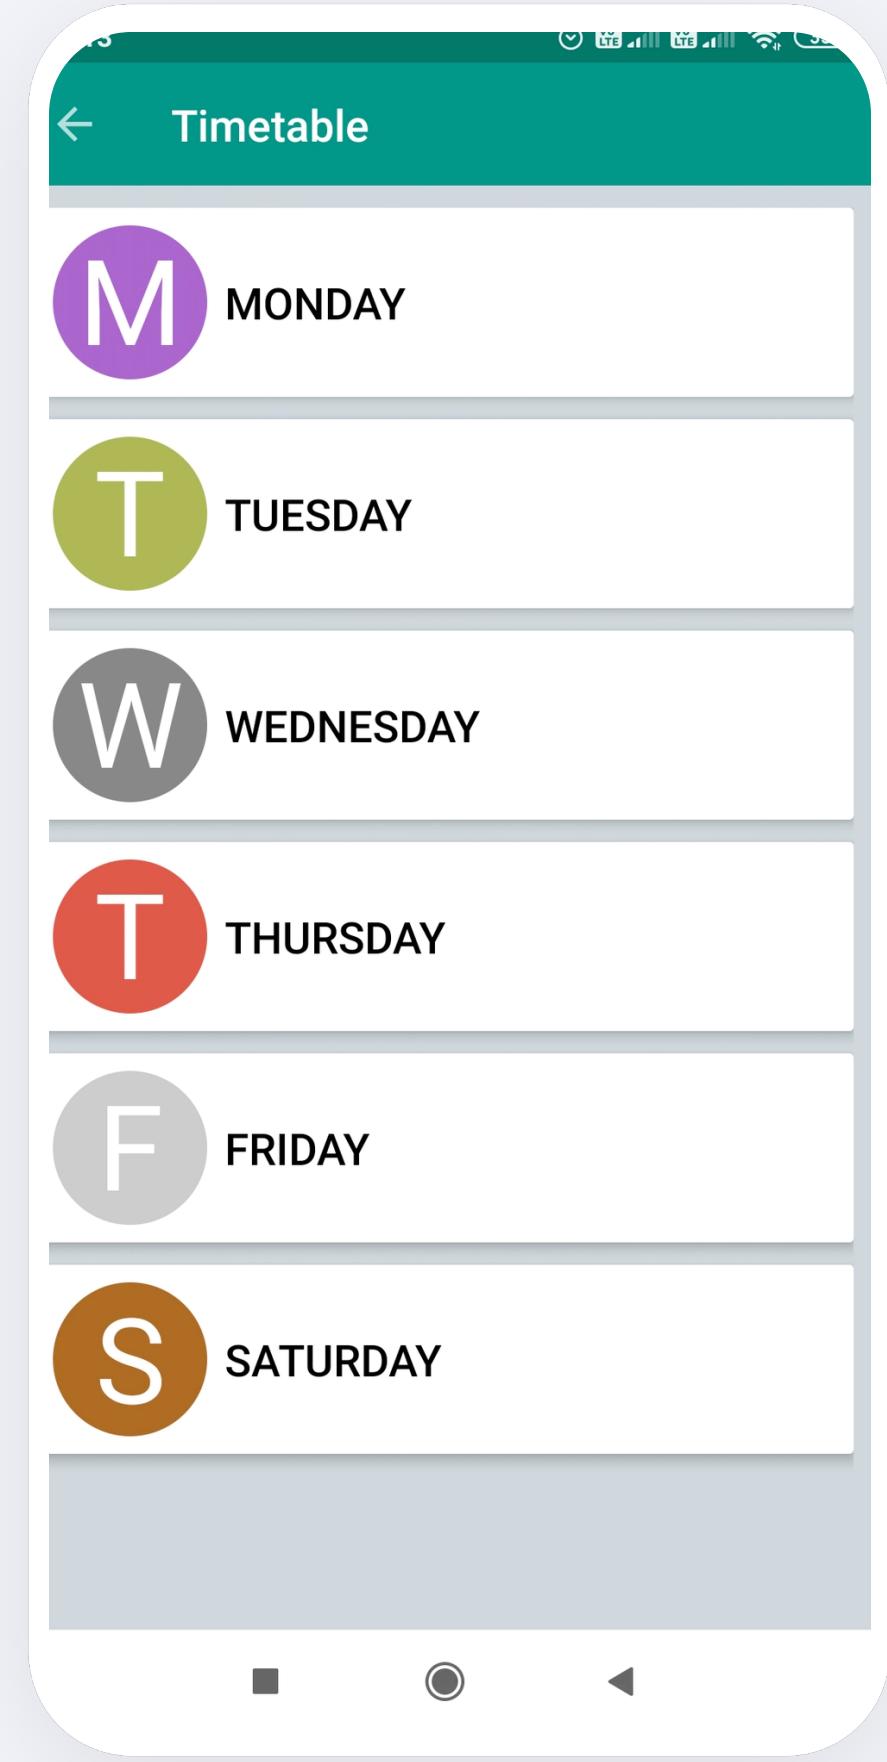

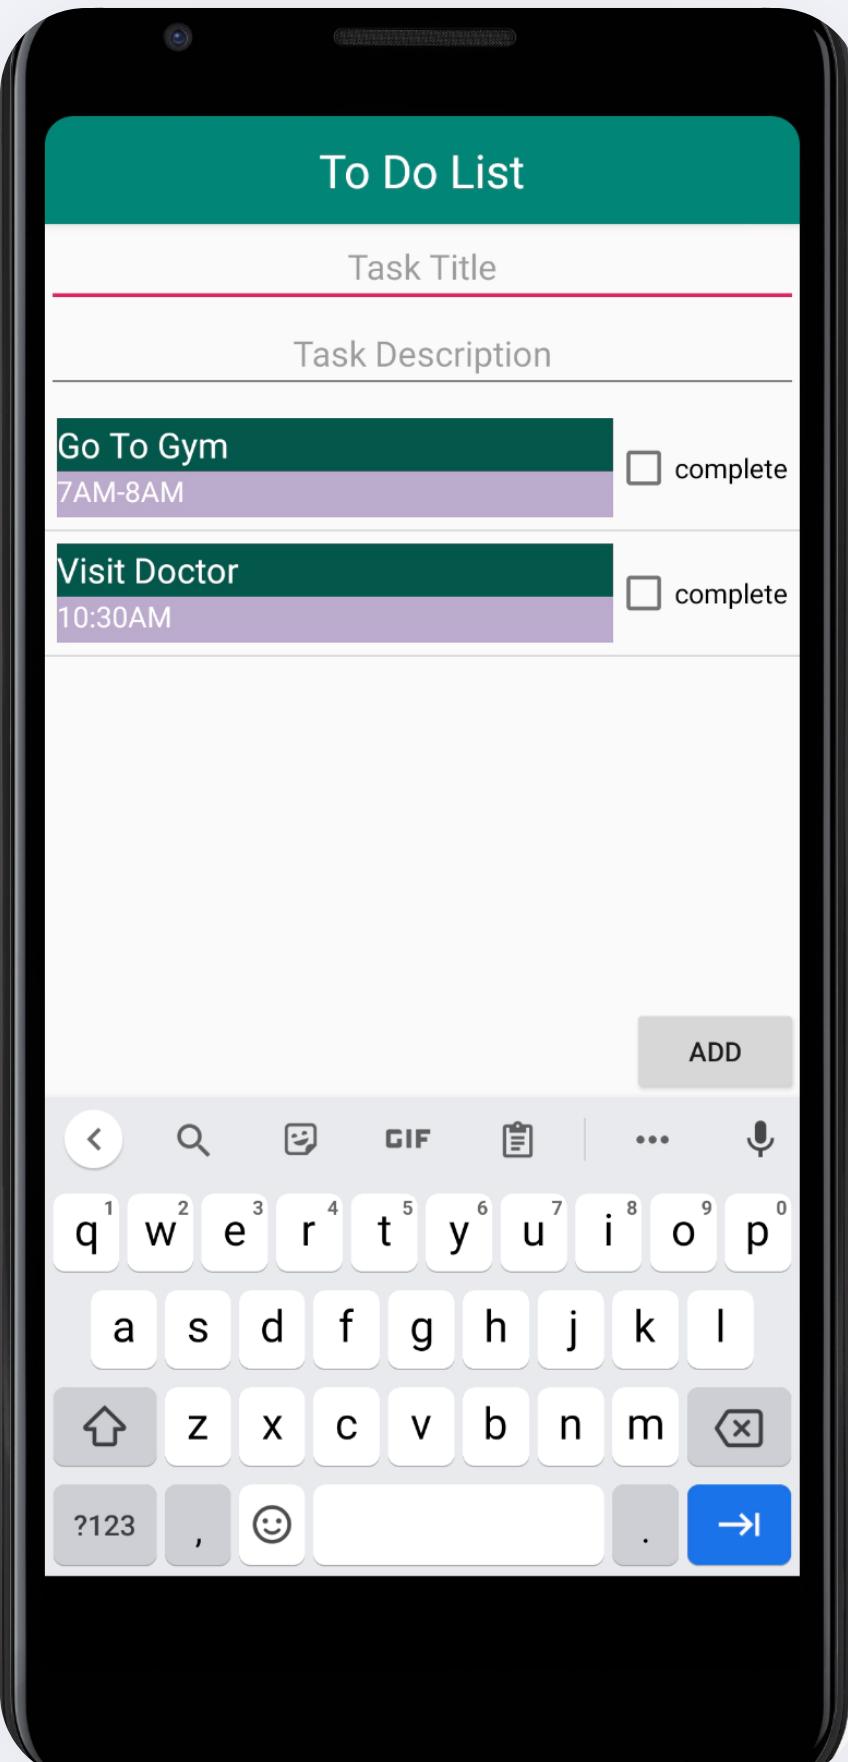

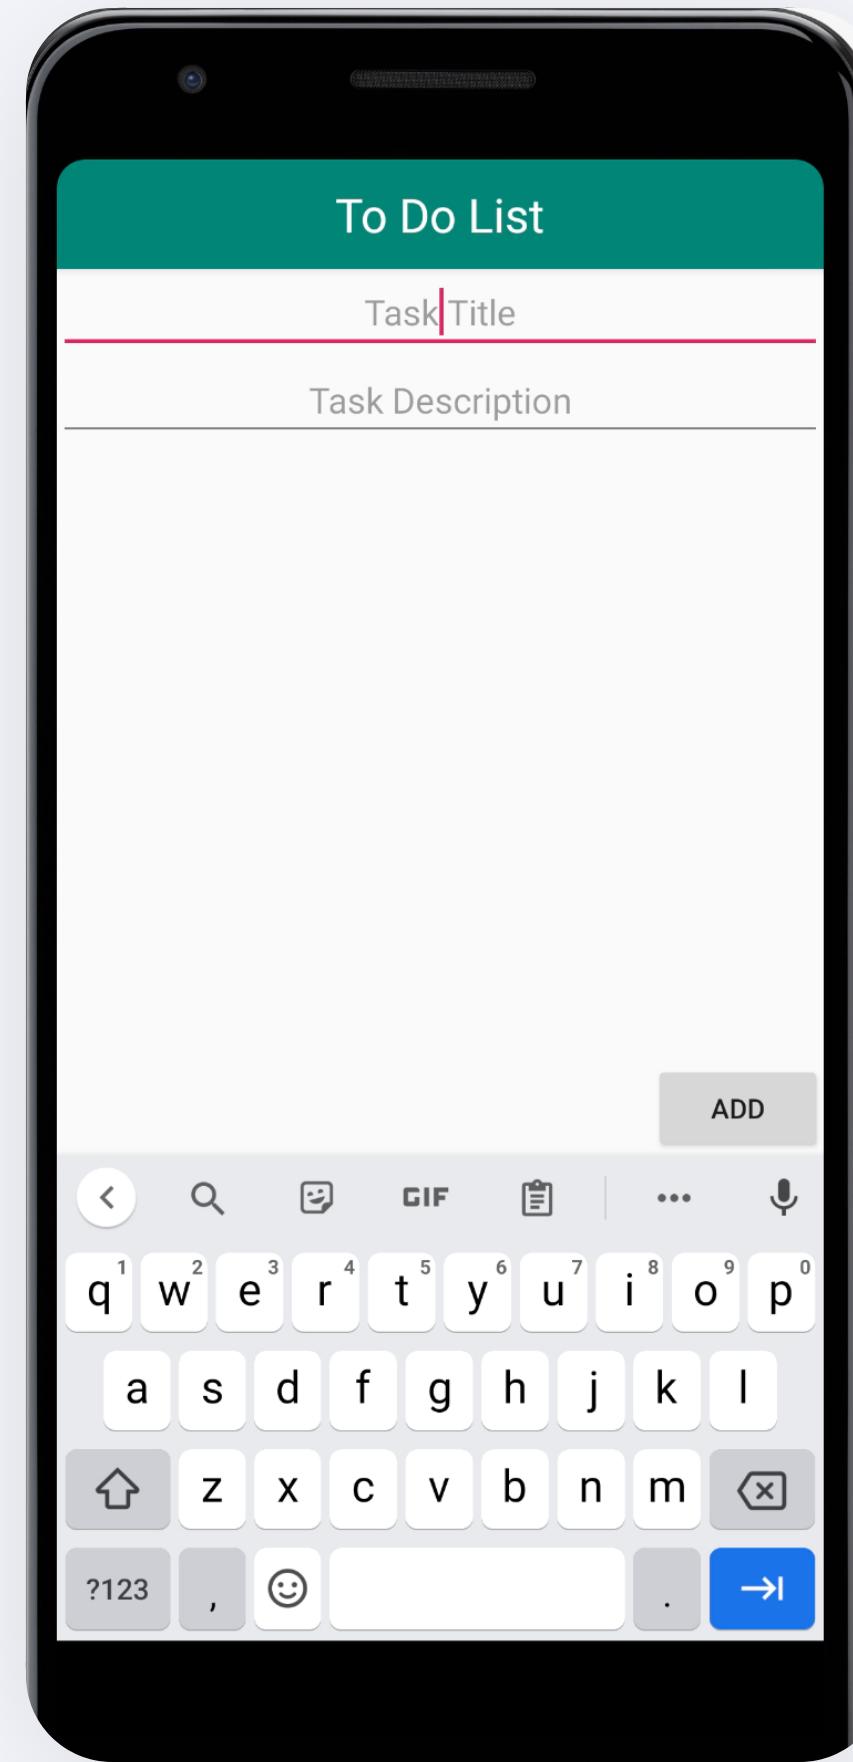

Task Manager basically allows the user to create multiple tasks and track its progress anytime.

Similar to Task Manager, the Time Table feature of *Student Heal* lets you create and follow the health routines for each user accordingly.

Download that features apk file to your android device and tap it to see it running

GO-TO-MARKET STRATEGY

- **Marketing:** Advertising through most of the sites that engage students such as YouTube, Online Learning Platforms, Query Platforms etc..
- **Revenue:** The basic services we developed as of now could be run for free. In order to enhance features we may have to incorporate more service providers like mentors and content creators.
To keep up with the running cost we may offer in-app advertising for brands that assists students like Byjus, UpGrad ,Internshala etc..
- **Traction:** We believe to be able to incorporate more services to make student life easier like adding.
 - > online workshops series to follow up with their favorite hobbies.
 - > providing mentors sessions in fields of their choice for one-o-one interaction to clear their queries .

GO-TO-MARKET STRATEGY

- **Partnerships:** As the platform is to uplift the student community, We hope to partner with brands that serve to do the same like discount on books and stationary /scholarships on learning platforms/ limited usage facility for online tools for students on unlocking certain levels of calories/progress or even for giving yourself the right amounts of rest .
- **Customers:** Students
Initially we plan to extend this service to college students as they have expected levels of discretion and school students associated activities would require parental access and permission.
